

50 Hz Products

Commercial Duty Pumps
Heavy Duty Solids Handling Pumps
Grinder Pumps
Basin Package Assembly
Low Pressure Sewer Packages

Since 1939, Zoeller Company has been manufacturing water pumps of many types. From pedestal pumps in the beginning to large HP, submersible, non-clog pumps in recent years, we have gained invaluable manufacturing experience from our humble beginning in August Zoeller's basement workshop.

Over the years, one of our most important mottos has been, 'We excel at 1,000 little things'. From start to finish, we take pride in our products. When you have residential or commercial wastewater issues, you can count on Zoeller to deliver the very best solutions. Our commitment to unsurpassed quality offers years of service and durability with a responsive and knowledgeable product support team just a phone call away.

MANUFACTURING IS IN OUR BLOOD...

Rather than using a 'puzzle piece' mentality and simply buying components from other sources and assembling them, we manufacture most of our products from start to finish, continually checking the quality throughout the entire process.

Quality is always the most important element at Zoeller. Above all, quality is what has made us successful and continues to drive the decisions we make. A quality product cannot be manufactured with low-grade components. By bringing in high-quality raw castings as well as machining and powder coating the pieces in house, we are able to control the quality of each part and identify any defect throughout the manufacturing process. Each piece is subjected to numerous quality checkpoints along the way to guarantee that it is the best of the best.

FACTORY TESTING IS NOT JUST A BUZZWORD...

Instead of running 'audits' on a calculated number of pumps, all submersible Zoeller pumps are 100% factory tested underwater prior to shipment. Each pump is subjected to a leak test to ensure that all gaskets, seals and mating surfaces will hold under pressure. After the pressurized leak test, the pump is powered up and run underwater to ensure that it is capable of the published head capacity and flow rate listed in our catalog and specification sheets. This testing allows us to guarantee the pump will operate out of the box every time, and you can rest assured that YOUR Zoeller pump was tested underwater for both electrical and hydraulic performance.

FULL BREADTH OF PRODUCT LINE...

Zoeller is your 'one stop shop' when dealing with dewatering and wastewater systems. We offer everything from a small fractional sump pump to a large, 100 HP, non-clog pump. From battery back-ups, check valves, sewage grinder systems, small prepackaged residential units or large prepackaged municipal systems, Zoeller can offer it all. Next time you are looking for a water or wastewater system, reach for the only catalog you will ever need... Zoeller Company!

Commercial Duty Pumps

COMMERCIAL EFFLUENT AND SEWAGE EJECTORS, 1.0 - 2.9 KW

6280, 6290 Series 1.0 - 2.3 kW

APPLICATIONS:

- · Pump stations
- Housing developments
- Pressure sewers

FEATURES:

- Cast iron support legs for free standing applicationsStainless steel lifting bail
- Cast iron construction with corrosion-resistant, baked-on epoxy powder coating
- 100% computer tested

OPTIONAL:

- · Moisture sensors
- Silicon carbide seals
- Additional cord lengths available in 11 m (35') or 15 m (50')
- Single phase models available with a type E/F (5 or 10 m), G (2 or 10 m) or I (5 m) plug (except 6189 and 6294)
- CE rated models available with a 10 m (33') cord and no molded plug.

Commercial Duty Pumps

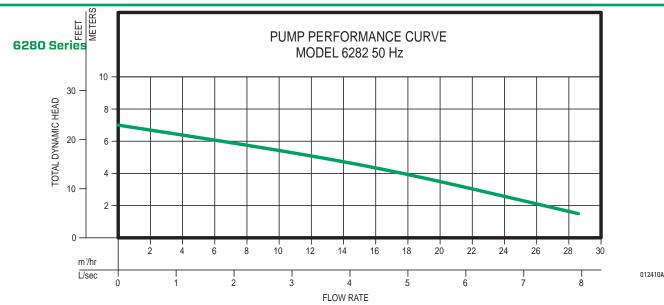

PUMP PERFORMANCE CURVES, 1.0 - 2.9 KW

6160 Series

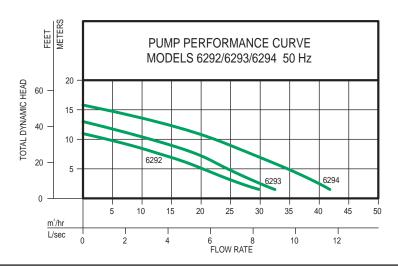

6180 Series

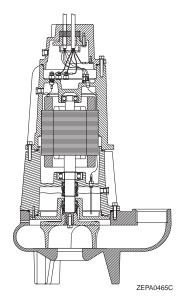

6290 Series

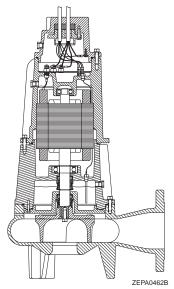

152828A

61 HD SERIES, 0.6 - 5.8 KW

3" NPT Vertical Discharge 0.6 - 5.8 kW

Flanged Horizontal Discharge 3", 0.6 - 5.8 kW 4", 0.6 - 5.8 kW

APPLICATIONS:

- Engineered lift stations
- Storm water removal
- · Wastewater transfer
- · Industrial wastewater

FEATURES:

- Cast iron construction with corrosion-resistant, baked-on epoxy powder coating
- Thermal sensor and moisture detection system with upper and lower probes
- Individually sealed conductors to eliminate cord wicking of liquids
- · Lifting lug integral part of housing
- Balanced concentric pump housing and impeller

OPTIONAL:

- · Silicon carbide seal(s)
- · Bronze impeller
- Vortex impeller
- Trimmed impeller
- Dry pit configuration (0.6 1.8 kW)
- 76 mm (3") solids capacity (4" discharge only)
- Certified tests
- Additional cord lengths available in 11 m (35') or 15 m (50')
- CE rated models available with a 10 m (33') cord

A00520B

62 HD SERIES, 2.8 - 10.0 KW

Flanged Horizontal Discharge 4", 2.8 - 10.0 kW 6", 2.8 - 10.0 kW

APPLICATIONS:

- · Engineered lift stations
- Storm water removal
- · Wastewater transfer
- · Industrial wastewater

FEATURES:

- Protected cable entrance with compression grommet that allows for field replacement of cable
- Moisture-detection system with upper and lower probes
- · Individually sealed conductors to eliminate cord wicking of liquids
- Lifting lug integral part of housing
- Cast iron construction with corrosion-resistant, baked-on epoxy powder coating

OPTIONAL:

- · Silicon carbide seals
- Bronze impeller
- Vortex impeller
- Trimmed impeller
- Dry pit configuration
- · High head unit (models 6222, 6223, 6224 available with 4" discharge)
- 6" discharge
- Additional cord lengths available in 11 m (35') or 15 m (50')
- CE models include a 10 m (33') cord

70 SERIES GRINDER, 2.5 KW

PUMP PERFORMANCE CURVES, 2.5 KW

Models 7011, 7012, 7013 reversing and single direction

APPLICATIONS:

- · Pump stations
- Housing developments
- Pressure sewers

FEATURES:

- · Cast iron support legs for free-standing applications
- Stainless steel lifting bail
- Protective cutter ring helps extend cutter life
- Cast iron construction with corrosion-resistant, baked-on epoxy powder coating
- Patented moisture-detection system with upper and lower probes
- Concentric pump housing with centerline discharge reduces radial loading

OPTIONAL:

- · Silicon carbide seals
- · Trimmed impeller
- Bronze impeller (7011 and 7013)
- Certified tests
- Additonal cord lengths available in 11 m (35') or 15 m (50')
- · CE rated models include a 10 m (33') cord

MODEL 7021 2 HP - PROGRESSIVE CAVITY GRINDER

FEATURES:

- Progressive cavity grinder pump with a hardened, stainless steel cutter and cutter plate
- Stainless steel mounting stand for freestanding installation
- Cast iron motor housing with powder coated epoxy finish
- Finned motor housing design provides great heat dissipation
- 1-1/4" NPT and BSPT horizontal discharge
- Construction Motor housing, cover, adapter and pump housing cast iron ASTM A-48, Class 30, 30,000# tensile strength, corrosion-resistant, powder coated epoxy finish
- · Viton square rings and gasket
- Stainless steel cutter and plate hardened to Rockwell C 55-60
- · Pressure relief valve
- Stainless steel legs provide for free-standing installation
- Stainless steel helix hydraulic rotor
- Buna-N hydraulic stator
- 230 V / 1 Ph, 1400 RPM, 2 HP
- · Housing Finned cast iron, oil-filled

APPLICATIONS:

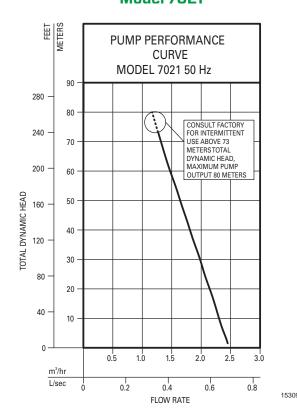

- · Low pressure sewer systems
- · High head sewage systems
- · Residential and commercial

OPTIONAL:

 Available with a CE rated 10m (33') H07RN cord, sensor cord and no molded plug

71 SERIES GRINDER, 3.2 - 5.3 KW

Flanged Horizontal Discharge 2-1/2" adaptable to 3" 3.2 - 5.3 kW

APPLICATIONS:

- · Sewage lift stations
- Housing developments
- Low pressure sewer systems
- · High vertical lift or long force mains

FEATURES:

- · Protected cable entrance with compression grommet that allows for field replacement of cable
- Individually sealed conductors for elimination of cord wicking liquids
- · Lifting lug integral part of housing
- Thermal sensor and moisture detection system with upper and lower
- Cast iron construction with corrosion-resistant, baked-on epoxy powder coating

OPTIONAL:

- High Flow (HF) or High Head (HH) models
 Reversing (Rev) models (3 Ph flanged models only)
- 2" NPT vertical discharge (HH and HF Units only)
- Silicon carbide seals
- Trimmed impeller
- Certified tests
- Additional cord lengths available in 15 m (50') or 23 m (75')

PUMP PERFORMANCE CURVES, 3.2 - 5.3 KW

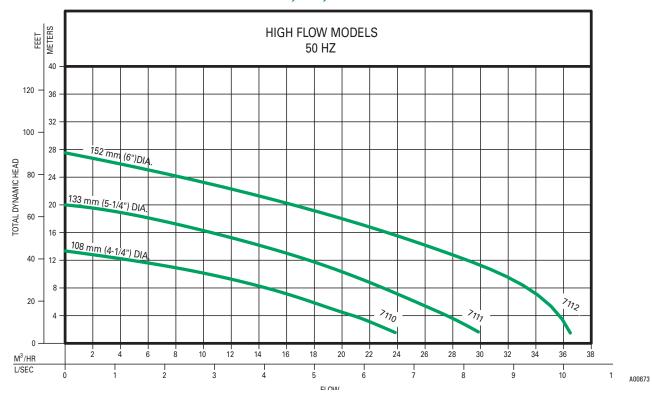

71 Series High Head Grinder 2-1/2" flanged or 2" NPT Discharge 3.2, 4.3, 5.3 KW

71 Series Reversing Grinder 2-1/2" flanged discharge 3.2, 4.3, 5.3 KW

71 Series High Flow Grinder 2-1/2" flanged or 2" NPT Discharge 3.2, 4.3, 5.3 KW

Lift Station Accessories

Standard Control Panel

Features:

- Simplex and duplex configurations
- NEMA 4X outdoor rating
- Lockable hasp
- Pump disconnect
- Motor contactor
- 115 Volt control circuit
- Pilot lights and selection switches
- High water alarm circuits with dry contacts
- Seal leak indication
- Thermal cut-out circuit
- Reversing circuits for 7011 and 71 Series **Reversing Grinder pumps**

Options:

- Inner door
- Elapsed time meter(s)
- Event counter(s)
- Alarm flasher
- Lightning arrestor/surge suppressor
- Anti-condensation heater
- Redundant off circuit

Custom panel designs available by request

1-1/4" - 3" Threaded "Full-Flow" Unichecks

- Vertical or horizontal installation
- Full flow design no restrictions
- Standard, 1-1/4", 1-1/2", 2", 3" female NPT pipe
- Neoprene polyester reinforced flapper smooth edge design with cast iron, non-corrosive metal backing plates and stainless steel fastener
- Rated at 345 kPa (50 PSI) (35 m [115'] of head) at 54 °C (130 °F)
- Cast iron body and stainless steel bolts
- Corrosion-resistant, powder coated epoxy finish

2-1/2" - 8" Flanged Check Valves for Sewage or Dewatering Applications

- Heavy-duty cast iron construction
- Angled seal for non-slam closure
- Non-clog design
- Reinforced disc
- Drip-tight seating
- Rated up to 200 psig
- Designed for both horizontal and vertical use

1-1/4" - 3" PVC BALL **VALVES**

- General purpose ball valve
- Ideal for a variety of applications
- 150 PSI Rated

2" - 8" Cast Iron Plug Valves Threaded Connection - 2" and 3" Flanged Connection - 2-1/2", 3", 4", 6", 8"

- Designed to handle solids-bearing flows
- Cast iron housing rated 1,207 kPa (175 PSI)
- 99% pure nickel welded seat
- 1/4 turn Buna plug
- Upper and lower ball bearings
- Provided with hand lever

1-1/4" & 2" BRONZE CHECK **VALVES**

- All bronze construction
- Metal to metal seals 150 PSI rated
- Vertical or horizontal installation
- Stops back flow of water
- Suitable for installation below basin cover

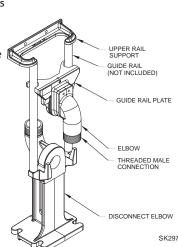

1-1/4" & 2" BRONZE BALL VALVES

- All bronze construction
- 150 PSI rated

Z-Rail Disconnect System (1-1/4", 1-1/2", 2")

- Cast iron construction with corrosion-resistant, baked-on epoxy powder coating
- Robust construction, designed to support a 136 kg (300 lb.) numn
- Provides for an easy pump install or removal operation with no need for personnel to enter basin
- Compact design for small spaces
- Adaptable to most 1-1/4" 1-1/2" and 2" pumps with a vertical NPT discharge
- 1-1/4" horizontal NPT discharge available for progressing cavity grinder pumps
- Grooved, machined fit for a positive seated rail plate
- O-ring seals prevent leakage
- Uses 3/4" IPS guide rails
- Intermediate stabilizer for pits over 3.7 m (12') deep
- Tested to seat at heads up to 1,103 kPa (160 PSI) (113 m [370'] TDH)

Guide Rail Systems

Guide Rail Systems (3", 4" & 6" discharge)

- · Automatic engagement and easy disengagement
- Ductile iron fittings (3" vertical) or Class 30 cast iron fittings (3", 4" & 6" flanged)
- Enamel-coated (3" vertical) or epoxy coated casting (3", 4" & 6" flanged) discharge
- · Supports pump
- Use 3/4" IPS (3" vertical) or 2" IPS (3", 4" & 6" flanged) guide rails. Brass, stainless steel or galvanized steel pipes recommended (not furnished).
- Intermediate stabilizers for pits over 3.7 m (12') (3" vertical) or 4.6 m (15') (3", 4" & 6" flanged) deep

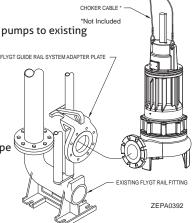

Products may not be exactly as pictured

3", 4" & 6" FLYGT Guide Rail System Adapters

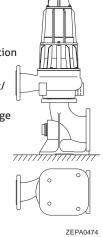

Adapter plates for retrofitting 3", 4" & 6" horizontal discharge pumps to existing Flygt rail systems.

- Cast iron construction
- Flange conforms to ANSI B16.10 fully flat/MSS SP-6
- For use with all pumps with 3", 4" or 6" horizontal discharges and 2" NPT rail pipe
- Flange gasket and stainless steel bolts included

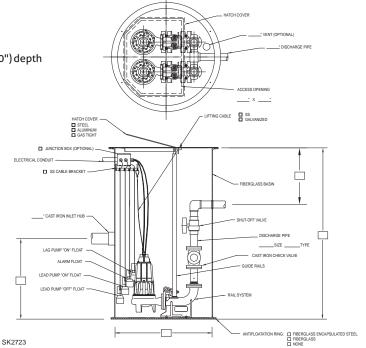

4" X 6" Flanged Dry Pit Mounting Stand With Clean-Out

- Class 30 epoxy coated cast iron construction
- 6" inlet / 4" outlet
- Flanges conform to ANSI B16.10 fully flat/ MSS SP-6
- For use on Dry-Pit pumps with 4" discharge
- 3" clean out plug

Engineered Lift Stations

- Factory assembled for job ready installation
- Built to specification and/or job requirements
- Fiberglass basins up to 244 cm (96") diameter and 610 cm (240") depth
- Steel and aluminum hatched access covers
- * 7.6 m 15.2 cm (3" 6") rail systems and discharge piping
- · PVC, galvanized and stainless steel discharge piping
- · Check valves and ball or plug valves
- Optional attached valve box

Professionals Training Professionals

The Center For Excellence training facility at Zoeller Company in Louisville, Kentucky offers a unique opportunity to experience the pump industry, learning from experts in the field. Bring your customers for an hour, a day, or more. Learn about the pump industry and why Zoeller products are designed to be the best for professionals.

What We Do

Gain first-hand experience in the unique and varied aspects of pump manufacturing and specification at our 6,000 ft² facility. In the demonstration room, our industry professionals offer live demonstrations and computer simulations of our latest products and core concepts. Lift stations including active controls are designed to demonstrate the how-and-why of pump technology. A state-of-the-art classroom provides space for lectures and group discussions with a library of cutaway models for reference.

Training Tailored To Meet Your Needs

Training experiences at the CFE are tailored to cover the specific topics that most interest you and your customers. All participants gain valuable technical and practical product knowledge. Our training staff will work with you to design the most profitable experience for your group. Some topics we have covered to date include:

Pump sizing

Troubleshooting a control panel

Product overview

Startup training

How performance curves are created

Rail systems
